The reference discloses a curable composition comprising a functionalized the structure [0015 et seq.], maleic anhydride [0031], an olefin alkyl copolymers [0084], [0081], an alkenyl aromatic monomer (see Abstructure)	(meth)acrylate copolymer such as ethylene ethyl acrylate act, [0047-0049] may comprise polybutadiene [0068].
The composition may further comprising an additive selected from flame return ultraviolet stabilizers, pigments, dyes, anti-static agents[0119], suit	able to form articles [0133-0134].
The disclosure of the reference differs from the instant claims in that it does amended in claim 13 in that ethylene ethyl acrylate copolymers has be	peen deleted.
However, said conclumers (C2) has the same functionality with other athyles	as (C1 and C3-C8) acridate conclumers in the same

owever, said copolymers (C2) has the same functionality with other ethylene (C1 and C3-C8) acrylate copolymers in the same composition due to the same mechanism to form the same or similar products. Therefore, it would have been obvious to one of ordinary skill in the art to select the ethylene ethyl acrylate copolymers from the reference to replace ethylen methyl acrylate copolymer, ethylene methyl methacrylate copolymer and ethylene ethyl methacrylate copolymer in the claimed composiiton since they have been shown to be effective in a similar system and thus would have been expected to provide adequate results.
